Object Lesson: Your Words are like Seed

SEEDS: Bring a variety of seeds

There are many sizes and shapes of seeds. Some are so small you can barely see them. They each grow into their individual kinds of plants. Some seeds grow into very big plants, some become fruits and vegetables that are very good for us. Some seeds become weeds or even poisonous plants. When you plant a seed you may not be able to dig it up again. You don’t see the plant right away, but after a while the plant will appear.

Our words are like seeds. When you plant them you can’t take them back. Our words can be uplifting, encouraging, critical, dishonest, truthful, wise or foolish. Our words affect us and other people. Be aware of what you say!
